

New Haven Climathon

Oct. 29, Martinez School, 1-5:30 p.m.

New Haven faces severe risks from climate change. Rising sea levels and storms will flood neighborhoods. We'll face dangerous heat. Droughts and floods elsewhere will send the cost of food soaring. It's time to understand what's coming and to take action to make our city more sustainable, equitable, and resilient. We are engaging with communities, scientists, and artists. **We want YOUR input! Join us to learn and reimagine New Haven!**
